AMOS Training Requirements

In order to guarantee a smooth flow of AMOS trainings at the customer's site, please make sure that the following items/installations are available:

- Please send us the list of participants approx. 1 week in advance so that the correct number of training handouts can be provided.
- Please remember that all course participants need to have attended to an “AMOS Basics” training prior to be able to participate in an advanced training !
- Training database with the latest available AMOS release (please let us know if you need help)
- Access to a copy of the productive database (at least for the instructor)
- Ideal State-of-the-art PCs (at least 128 MB free memory, recent processor and a minimum resolution of 1024 x 768) for each participant and one additional for the instructors
- High resolution projector linked to the instructor's PC (please make sure that the image is visible on PC's screen as well as projected to the wall)
- Screen or at least *white* wall for projection
- PowerPoint installed on the teachers' PCs (version not below Office XP)
- Possibility to access a memory stick (USB) from the instructor's PC
- List of all user logins and passwords (participants and instructor PC)
- Internet access on the instructor PC
- Whiteboard and/or flipchart including markers
- On-site/stand-by availability of your IT staff during training in case of problems
