

Course Description

AMOS Maintenance Control Training

Course Description

This course has been designed around different AMOS applications concerning work in the maintenance control department. You will learn about the different programs and workflows within the software needed for a successful work with AMOS.

Course Objectives

Upon completion of this course, you will be able to:

- ✓ Evaluate the crucial role of workorders and understand the difference between Tech Log and Maintenance Log in AMOS
- ✓ Perform different types of label booking with rotables and assemblies
- ✓ Administer unscheduled removals and release them either for repair or return them back to service.
- ✓ Perform a complete cannibalization / robbery process with all relevant bookings in AMOS.
- ✓ Understand the meaning of the Maintenance Forecast as the main planning hub in AMOS and get an overview and explanation of all scheduled maintenance events and their background information.
- ✓ Check workpackage planning at different stations in relation to the arrival and departure gates, available ground-time and manpower
- ✓ Register any kind of event or problem reported by a station, a pilot or a mechanic.
- ✓ Track all kind of maintenance events and their consequences with different filter settings.
- ✓ Enter and manage experience sheets.
- ✓ Track and check occurrences in AMOS
