

Course Description

AMOS Advanced Maintenance Planning Training

Course Description

This course has been designed around the different AMOS applications concerning work in the planning department.

You will learn about the different programs and workflows within the software needed for a successful work with AMOS.

Course Objectives

Upon completion of this course, you will be able to:

- ✓ Remove, install, exchange components or assemblies on aircraft via “*Label Booking*”, rotatable release.
- ✓ Understand how to setup and administrate special control dimensions.
- ✓ Allocate resources and facilities (hangar slots, skills, material).
- ✓ Create templates for downtimes, prepare a specific downtime for an aircraft and keep track of the work progress.
- ✓ Introduction to various modules of Shift Planning.
- ✓ Time tracking and View/edit booking.
- ✓ Track the information related to different orders
- ✓ Generate reports out of the different programs

Course Topics

- Part and Rotable Administration
- Label Booking
- Resource Management
- Graphical Downtime
- Shift Planning
- Time Management
- Order Tracking
- Key Performance Indicators Analyzer
