

Course Description

AMOS T/S & Reliability Training

Course Description

This course is tailored around the different AMOS applications concerning trouble-shooting and reliability statistics work in the engineering department. It teaches about the different programs and workflows needed for a successful and uncomplicated work with AMOS in this area.

Course Objectives

Upon completion of this course, you will be able to:

- ✓ Define new parts and specify their requirements and special rules
- ✓ Follow and steer existing problems and incidents in “Failure Case Manager”.
- ✓ Follow the status of all open technical events of one aircraft or fleet
- ✓ Administer the unscheduled parts removal
- ✓ Set up reliability tracking and evaluate the results

Course Topics

- Part Administration
- Failure Case Manager
- Event Tracking
- Technical Delays and Cancellations
- Electronic Pending Shelf
- Reliability Module
- Key Performance Indicators Analyzer
- Power Plant – In-Flight shut down on engines

Who should attend

Everyone who works in the Engineering Department and wants to achieve more efficient and successful working skills in AMOS.

Prerequisite	AMOS Basics Training AMOS Basic Engineering Training
Skill	Advanced
Certification	After completion of the course the participant receives a letter of participation.
Type	Classroom
Duration	1 Day
Times	Classes begin at 09:00AM. The course usually ends at around 05:00PM. Please check your confirmation letter for exact time.
Training Costs	See pricelist
Registration	Please register your participant(s) via www.swiss-as.com .
