

Course Description

AMOS Line Maintenance Training

Course Description

This course has been designed to give technicians a comprehensive overview of all the AMOS programs that they need to perform their work in the Line Maintenance environment.

Course Objectives

Upon completion of this course, you will be able to:

- ✓ Use Stock Information, Order Tracking and Parts Tracking to search for information about materials
- ✓ Request, confirm and cancel a pickslip
- ✓ Move unservicable parts between stations using the Transfer Order
- ✓ Open, transfer and close workorders
- ✓ Search for any workorders in Workorder Information System
- ✓ Record structural damages
- ✓ Perform the removal/installation of components
- ✓ Use Technical Assistance to report issues within AMOS
- ✓ Understand the use of the Workpackage and how to view the contents
- ✓ Refer to programs such as Experience Sheet, Modification Status and Assembly Configuration Management for troubleshooting information purposes
- ✓ Monitor the health of the fleet using Fleet Tracker and report using Aircraft Status Report
- ✓ Track Oil Consumption Statistics
- ✓ Search for and report on publications held at your line station
- ✓ Request holiday or overtime slots and report sick leave using AMOS
