

Course Description

AMOS Maintenance Control Training Part 2

Course Description

This course has been designed around different AMOS applications concerning work in the Maintenance Control Center. You will learn about the different programs and workflows within the software needed to utilise AMOS.

This classroom session is Part 2 of 2, the participants must have performed Part 1 which is available as an E-Learning.

Course Objectives

Upon completion of this course, you will be able to:

- ✓ Record in AMOS any kind of event or problem reported by a station, a pilot or a mechanic
- ✓ Track all kind of maintenance events and their consequences with different filter settings
- ✓ Perform initial trouble shooting of an aircraft defect
- ✓ Understand the crucial role of workorders in AMOS
- ✓ Perform different types of label booking with rotables and assemblies
- ✓ Understand the role of the Maintenance Forecast as the main planning hub in AMOS
- ✓ Be able to identify and understand the meaning of all scheduled maintenance events and their background information as presented in the Maintenance Forecast
- ✓ Check workpackage planning at different stations in relation to the available ground-time and manpower
