

## Course Description

### AMOS Base Maintenance Training

#### Course Description

This course has been designed to give technicians a comprehensive overview of all the AMOS programs that they need to perform their work in the Base Maintenance environment.

#### Course Objectives

Upon completion of this course, you will be able to:

- ✓ Use Stock Information, Order Tracking and Parts Tracking to search for information about materials
- ✓ Request, confirm and cancel a pickslip
- ✓ Open, transfer and close workorders
- ✓ Search for any workorders in Workorder Information System
- ✓ Record structural damages
- ✓ Perform the removal/installation of components
- ✓ Use Technical Assistance to report issues within AMOS
- ✓ Book your working time against various maintenance events
- ✓ Understand the use of the Workpackage and how to manage the contents
- ✓ Create a finding on a taskcard, defer and close a taskcard
- ✓ Refer to programs such as Experience Sheet, Modification Status and Assembly Configuration Management for troubleshooting information purposes
- ✓ Handover tooling between technicians as part of a tool control function
- ✓ Request holiday or overtime slots and report sick leave using AMOS
