

Course Description

AMOS Modification Control Training

Course Description

This course has been developed to give the participant a full and comprehensive overview of the various programs which are used to manage and monitor documents such as Engineering Orders, Airworthiness Directives and Service Bulletins. Participants will also learn how to set-up and use the AMOS Weight & Balance functions.

Course Objectives

Upon completion of this course, you will be able to:

- ✓ Enter, define and edit modification documents.
- ✓ Define time requirements and effectivities
- ✓ Build “signoff trees” of modification document hierarchy.
- ✓ Assign modification documents to the applicable aircraft registrations or components.
- ✓ Track the flow of the implementation a modification document through AMOS.
- ✓ Extract various modification related reports (e.g. SB/AD status).
- ✓ Set-up and use the AMOS Weight and Balance functions.
- ✓ Manage approval requests for documents

Who should attend
