Course Topics

Overview

- In the application path get an overview of the Quality Audit modules
- AMOS Terminology related to quality audits
- See the steps in a high level overview to set up and complete an audit from start to finish
- Watch the video Quality Audit flow

Prepare an audit

- Configure and define the basic data and questions for forthcoming audits
- Set up basic values in Audit Configuration in order to prepare an audit
- Prepare and modify questions by using QA-Question Admin

Create an audit

- Use Quality Audit Tool to create and manage audits
- Learn how to inform users about planned audits

Report an audit

- Electronic Audit reports back the result of each evaluated question during the audit
- Use View/Edit Findings to view, edit, report and close findings

Suggest corrective actions

- Watch the suggestion flow where audited people make suggestions by using the Suggest QA Actions
- Use the Suggest AQ Actions program to suggest corrective actions for any open findings

Close an audit

- Watch the video to find and close opened findings and close the audit thereafter
- See how the auditor can inform the auditees about the closure of an audit
- Learn how to reopen and modify a closed audit
