

Course Description

AMOS Upgrade / Transition Training

Course Description

This training has been developed to give a customer an overview of the major changes that they can expect when migrating from one AMOS version to another. The content will be put together based on the customer's current version and their target migration version upon request.

The content has been grouped by business area to better enable the customer to assign the correct Key Users or SME's (System Matter Experts).

Course Objectives

Upon completion of this training, you will be able to:

- ✓ Evaluate the impact on different business areas
- ✓ Identify additions and changes to;
 - Parameters
 - Workflows
 - Licences
- ✓ End of life cycle timeline for individual programs
- ✓ Understand the changes affecting individual programs and in which version
