Course Description

AMOS Base Maintenance Training

Course Description

This course has been designed to give technicians a comprehensive overview of all the AMOS programs that they need to perform their work in the Base Maintenance environment.

Course Objectives

Upon completion of this course, you will be able to:

- Use Stock Information, Order Tracking and Parts Tracking to search for information about materials
- Request, confirm and cancel a pickslip
- Open, transfer and close workorders
- Search for any workorders in Workorder Information System
- Record structural damages
- Perform the removal/installation of components
- Use Technical Assistance to report issues within AMOS
- Book your working time against various maintenance events
- Understand the use of the Workpackage and how to manage the contents
- Create a finding on a taskcard, defer and close a taskcard
- Refer to programs such as Experience Sheet, Modification Status and Assembly Configuration Management for troubleshooting information purposes
- Handover tooling between technicians as part of a tool control function
- Request holiday or overtime slots and report sick leave using AMOS
