

Swiss-AS Training – Course Description

1/2

AMOS Configuration Management Introduction, Hardware – VCT

This session will introduce the concept of Hardware Configuration Management in AMOS, migrating existing assemblies from Reference Tree Administration as well as importing or building configurations for aircraft and component assembly trees.

Course Objectives

Upon completion of this course, you will have a clear understanding of:

- ✓ An overview of the parameters required to activate the configuration management logic
- ✓ Programs that are affected by the Configuration Management logic
- ✓ Migrate an existing reference tree from APN 246 to Configuration Management, APN 2818
- ✓ Create and manage configurations for aircraft and components
- ✓ Compare “As-Booked” configuration and “Allowed” configuration
- ✓ Functional Positions in AMOS

Course Topics

- Configuration Management
- Component Inspection and Records
- Component Tree Label Booking

Who should attend

Everyone who has a role in managing the configuration of aircraft or component assemblies.

Prerequisite

AMOS Basics WBT and Engineering Part 1 and Part 2

Skill

Medium to Advanced

Type

Virtual Classroom

Duration

Approx. 3 hours including breaks

Times
