Swiss-AS Training – Course Description

AMOS AIM & Data Transfer Basics Training

Transferring data and setting up and handling interfaces is an important part of AMOS, either for system administrators or interface managers. If these topics are part of your daily work or your responsibility in general, then this training is perfect for you. It includes the creation of importable files for AMOS as well as importing and interface handling.

Course Objectives

Upon completion of this course, you will be able to:

- ✓ Prepare data to import them into AMOS in the correct format
- ✓ Learn about tools to prepare this format
- ✓ Check the correctness of the data before the import
- ✓ Import data into AMOS using Data Transfer
- ✓ Import OEM documents and make them available
- ✓ Configuration of AIM
- ✓ Import of Data using AIM
- ✓ Export of Data using AIM

Course Topics

- Overview of the file format supported by Data Transfer (APN:261)
- How to create this format using external tools
- Check data to be imported of their correctness (APN:261)
- Import data using Data Transfer (APN:261)
