

Swiss-AS Training – Course Description

1/2

AMOS Component Repair, Overhaul & Manufacturing (CROM)

Running your own shop is a challenge. It doesn't matter if I'm servicing third-party customers or just handling, repairing or manufacturing my own parts. From planning to execution to completion, everything needs to be well organized and easy to work with. If all of this is part of your job description, then this course is for you.

Course Objectives

Upon completion of this course, you will be able to:

- ✓ Create and execute various Component Workpackages
- ✓ Handle the repair cycles of Consumables Repairables and Rotables
- ✓ Manage "Close Loop" and "Open Loop" in component context
- ✓ Handle the repair cycle of an assembly
- ✓ Forecast and schedule Shops operations in using Component Planning Program

Course Topics

- Component Workpackage (APN3075)
- Worktemplate Manager (APN 1848)
- Workorder (APN 1418)
- Repair Administration (APN 1431)
- Component Planning (APN 3508)
- Component Booking (APN 3296)

Who should attend

Everyone who works in an internal shop and wants to achieve advanced working skills in AMOS Component Planning and Component Workpackage.
