Swiss-AS Training – Course Description

AMOS Maintenance Programs – Single Operator Part 2 Training

A well-managed maintenance program is essential for aircraft airworthiness and operational reliability. This training equips single AOC operators with the knowledge and skills necessary to effectively manage their maintenance program, including ongoing adjustments, reviews, and updates. Participants will learn how to create and administer checks, generate insightful reports, and navigate the different task card options available within the AMOS system.

Course Objectives

Upon completion of this course, you will be able to:

- ✓ Manually define a new Master Maintenance Program (MMP) which will serve as the data source for one related Operator Maintenance Program (OMP)
- ✓ Define MP Tasks and related taskcards
- ✓ Pre-set and initialise taskcards
- ✓ Perform MP Revisions (including Temporary Revisions)
- ✓ Understand how different Taskcard types are handled in AMOS
- ✓ Extract various reports
- ✓ Understand planning/production flows in the workpackage context, (incl. WP recollection after MP revision)
- ✓ Create and initialise checks
- ✓ Review taskcards accomplishments and history
- ✓ Setup and use of approval control for MP / Taskcards
- ✓ Taskcards Next Due Calculation options

Course Topics

- Maintenance Programs definition and revision – (APN:249)
- Checks Creation and Initialisation (APNs: 1895, 281 and 753)
- Taskcards Reports and History review (APNs: 673, 2151, 876 and 712)
- Overview of the planning/production flow (workpackage and report back) and of the TC recollection after MP revision (APNs: 1418, 1844, 58 and 280)
- Overview of Approval control for MP and Taskcards (APNs: 1442, 2110, and 2111)
- Additional related Programs and Topics
