

## AMOS Report Designer Training

Today, it is part of the daily work of administrators or key users to create database queries and make them available in the standard AMOS layout. The customer-specific adaptation of system reports also plays a major role here. If designing system reports is part of your job, then this training course is just right for you.

### Course Objectives

Upon completion of this course, you will be able to:

- ✓ Create new reports – define the master layouts
- ✓ Create report objects, properties
- ✓ Link an existing SQL data source to a table object
- ✓ Export the report to a file
- ✓ Configure the Report Generator dialogue
- ✓ Define wildcards and link them to report object
- ✓ Link the report to the AMOS application tree
- ✓ Update and customize version of a system report
- ✓ Define a primary and secondary data source and clone objects
- ✓ Learn about some advanced features

### Course Topics

- Set of exercises that will gradually introduce Report Designer (APN:966)
- Creating new reports
- Nested reports
- System report customisation on Shipment (APN:2392) example
- Common pitfalls
- Helpful tools and tips for using SQL statements on reports

### Who should attend

Only persons with a very good AMOS knowledge.

The course does not include any training on how to write SQL statements and SQL knowledge is not a precondition to attend the training. Nevertheless, if the participant does not have profound SQL writing skills, we highly recommend that

he/she develops these skills separately by following a specific course or by any other means.

<b>Prerequisite</b>	AMOS Basics Training A very good AMOS knowledge We recommend AMOS Data Structure Training
