This course is tailored around the different AMOS applications concerning Software Management, Hardware and Software Locations, Aircraft Configuration and its modification. The course contains different programs and workflows needed for a successful application of AMOS in this area.

Course Objectives

Upon completion of this course, you will be able to:

- Upload an Initial Configuration of Software, locations and rules of a new aircraft
- Compare Authorised Configuration versus As Flying Configuration
- Correct discrepancies of compared Configurations
- Modification of Software
- Assign Software to physical parts (e.g. USB Stick)
- Check availability of Software
- Carry out the change of Software based on Workorders
- Check the correct Software status in connection to Aircraft Configuration
- Change Software on the Aircraft

Course Topics

- Boeing 787 Authorized Configuration Parser (APN 2333)
- Configuration Definition (APN 2818)
- Part Administration (APN 59)
- Software Management (APN 2618)
- Part Availability (APN 204, APN 2015, APN 2121)
- Workorders (APN 1418)
- Book Software in the Aircraft based on Workorder (APN 1418)
- Modification Control (APN 63)
- Reporting Back Events (APN 63, 280)
- Check actual Aircraft Configuration (APN 2818)

Who should attend

Everyone who has to deal with the extensive software requirements especially on new generation aircraft.

Prerequisite

AMOS Engineering Part 1 & Part 2 (highly recommended)
Modification Control (highly recommended)
