Swiss-AS Training – Course Description

AMOS Goods Receiving VCT Training

This course explains and demonstrates the “physical” and “quality” receiving of various goods through Goods Receiving and Component Inspection & Records programs.

Course Objectives

Upon completion of this course, you will be able to:

- ✓ To perform a complete receiving of Consumables, Rotables, and Assemblies in AMOS
- ✓ Understand the different possibilities AMOS offers during the receiving process, including:
  - ✓ Save, Reject Pre-receiving
  - ✓ Sending parts to quarantine
  - ✓ Supplier rating
  - ✓ Creating new Part-Location link etc.
- ✓ Use the different associated programs
- ✓ Understand the different parameters and workflows that can manipulate the behavior of the receiving programs

Course Topics

- Physical receiving of different types of parts (APN 2121)
- Quality receiving of components and assemblies (APN 2293)
- Associated programs with the above-mentioned main programs (APN 2015, 1328, 1208, 723, 335, 869, 2392)
