Swiss-AS Training – Course Description

AMOS Aircraft Administration Advanced Features VCT

This course has been designed to explore advanced features, available in Aircraft Administration, that allow AMOS customers to handle critical scenarios such as long-term aircraft grounding or airplane involvement in a major accident.

Course Objectives

Upon completion of this course, you will be able to:

- ✓ Set an aircraft under investigation
- ✓ Deactivate an aircraft
- ✓ Suspend/Resume an aircraft (e.g. for extended grounding)
- ✓ Understand the purposes, consequences, and effects of each of the above-listed situations.
- ✓ Understand what licenses are required to allow the relevant access rights

Course Topics

- Aircraft Administration (APN 308)
- Maintenance Forecast (APN 1844)
- Maintenance Event Initializer (APN 1895)
- Admin Logins & Admin Roles (APN 14 ,15) (for the applicable licences)

Who should attend

AMOS users involved in the fleet handling and management, especially when dealing with special circumstances such as extended grounding of airplanes or major accidents affecting an aircraft registration.

Prerequisite

AMOS Basics Training
Basic knowledge of Aircraft Administration (APN 308), Maintenance Forecast (APN 1844), and Maintenance Event Initialiser (APN 1895) are recommended.

Skill

Advanced

Type

Virtual Classroom
