

AMOS Parts Consumption Forecast - VCT

The Parts Consumption Forecast is the most important tool for logistics in your company. This course is designed to show you how to setup and administer the Parts Consumption Forecast in AMOS. During this session you will learn important scheduled jobs including preconditions and related workflows. To show the flow of a simple part request until the ordering of the part, we will create a simple Workorder including a part request. Furthermore this course will show the preconditions that are needed from any event containing a part request to show up in the program. During this session you will learn the flow of a part request, how to use the various filter settings and extract details from the program.

Course Objectives

Upon completion of this course, you will be able to:

- ✓ Know the scheduled jobs for Parts Consumption Forecast
- ✓ Know the preconditions to get the correct data within the program
- ✓ Know corresponding settings for your needs
- ✓ Understand the flow of a part request
- ✓ Know related Workflows
