

# AMOS Press Release

## Swedish MRO provider Braathens Technical now fully operational with AMOS February 2012

### Implementation project successfully completed

After 12 months of project work, Swiss-AS is delighted to announce the go-live of AMOS at Braathens Technical in Sweden. The major modules were smoothly put into operation via a big bang approach whereas modules such as Publication Management or Shift Planning will be implemented at a later stage. AMOS is now used by 100 Braathens employees, who received e-learning and classroom training to gain the necessary AMOS knowledge.

During the pre-sales phase, the Braathens management took advantage of their network in the aviation industry and visited AMOS customers for information regarding the suitability of AMOS for their live operation.

It is worth mentioning that the Swedish MRO provider uses AMOS "as is" since it covers all of their requirements and no customisations were needed.

"I am delighted now being operational with the AMOS system after a year of exciting and hard work by the project team. It is critical to have a system in place that is easy to work with, give employees at all levels a good oversight and creates opportunities to increase our efficiency. AMOS is a system that fulfils these requirements. I am also confident that AMOS is being continuous developed to meet also tomorrow's requirements", says Per Andersson, CEO Braathens Technical.

### Launching customer for latest NetLine/Ops version

Braathens Technical is providing MRO services for Malmö Aviation, the official launch customer for NetLine/Ops 9 from Lufthansa Systems. As a result, Swiss-AS was in the lucky position to test the existing AMOS interfaces to the MaintenanceControl module of NetLine/Ops at an early stage, and is very pleased to inform its customers about the compatibility of AMOS and the latest version of NetLine/Ops MaintenanceControl.

### About Braathens Technical

Braathens Technical AB is an MRO provider in Sweden that provides Line Maintenance for RJ100, BAe146, A320, B737 and E-170/190 aircraft types. As part of the Braathens Aviation group, the MRO provider is based in the south of Sweden (Malmö) but is also active in Stockholm, Gothenburg, Umeå, Helsinki and Milan. Braathens Technical offers its services not only to its sister company Malmö Aviation (12 x AVRO RJ) but also to other European airlines.

Braathens Aviation consists of several aviation related companies and is therefore in the position to offer a wide range of aeronautical services.

### About Swiss AviationSoftware and AMOS

AMOS - developed and distributed by Swiss AviationSoftware - is a comprehensive, fully-integrated software package that successfully manages the maintenance, engineering and logistics requirements of modern airlines and MRO providers by fulfilling all airworthiness standards. Swiss-AS is a 100% subsidiary of Swiss International Air Lines Ltd., and counts more than 100 customers worldwide to its loyal customer base, including pure operators of all sizes, major low-cost, regional and flag carriers, large airline groups and MRO providers.

The fact that none of them has ever replaced AMOS by another system speaks for itself. Swiss-AS' AMOS is the industry-leading MRO software in Europe and one of the best-selling solutions world-wide. Swiss-AS has its headquarters in Basel, Switzerland, and is also represented in Miami, FL, USA.
