

Swiss-AS Press Release

Royal Air Maroc takes off with AMOS December 2013

AMOS to support the company restructuring process

Swiss-AS and Royal Air Maroc (RAM) recently signed agreements to implement AMOS at the Moroccan flag carrier. By launching an RFP process, followed by onsite software presentations in Casablanca, RAM was looking for an MRO software that is capable of supporting the company's restructuring strategy. Increasing personnel productivity and process optimization in the E&M sector are the main objectives. The implementation of a state-of-the-art MRO software will ultimately result in reduced aircraft operating costs. Being a full-fledged and highly integrated software that is suitable to fulfil the activities of technical departments, AMOS was chosen as RAM's favourite M&E software system.

Royal Air Maroc premieres as North African AMOS community member

The go-live should take place approximately ten to twelve months after kick-off. During that time 100 back-office users and more than 200 technical staff will be familiarized with AMOS and trained to use the MRO software in the context of the then newly-introduced maintenance processes. A considerable number of Swiss-AS employees are fluent in French and this will be a considerable advantage during the project as well as in the post-go-live phase.

"It is a pleasure to welcome RAM, our first customer from North Africa, into the AMOS community. With the delivery of the B787 fleet, RAM will benefit from AMOS' advanced functions, which address the specific needs of new generation aircraft," says Ronald Schaeuffele, CEO of Swiss-AS.

About Royal Air Maroc (RAM)

Royal Air Maroc is Morocco's flag carrier and headquartered at the Casablanca-Anfa Airport. The airline operates scheduled international flights (more than 80) from Morocco to Africa, Asia, Europe, North America and Brazil as well as domestic routes and charter services.

Royal Air Maroc has a fleet of more than 45 aircraft including the types B737, B747, B767 and ATR-600.

About Swiss AviationSoftware and AMOS

AMOS - developed and distributed by Swiss AviationSoftware - is a comprehensive, fully-integrated software package that successfully manages the maintenance, engineering and logistics requirements of modern airlines and MRO providers by fulfilling all airworthiness standards. Swiss-AS is a 100% subsidiary of Swiss International Air Lines Ltd., and has almost 130 customers worldwide. This loyal customer base includes pure operators of all sizes, major low-cost, regional and flag carriers, large airline groups and MRO providers. The fact that none have ever replaced AMOS with an alternate system speaks for itself. Swiss-AS is an industry-leading MRO software provider and AMOS is one of the bestselling MRO software solutions worldwide. Swiss-AS has its headquarters in Basel, Switzerland and is also represented in Miami, USA and Singapore.
