Swiss-AS Press Release
UTair Aviation Group takes off with AMOS
December 2013

Efficient evaluation process culminates in choosing AMOS

Swiss-AS, provider of the industry-leading M&E software solution, AMOS, is proud to announce the latest addition to its loyal customer base: UTair Aviation Group.

"We are impressed by the highly efficient evaluation process of UTair, which took only a few months though it included a tender process, an onsite presentation and an exchange of information between members of the AMOS community," says Ronald Schaeuffele, CEO of Swiss-AS.

For UTair it was of paramount importance to find a proven, best-of-breed to modernise and harmonise their MRO software environment. Initially, UTair will implement AMOS for approximately a quarter of its fixed-wing fleet while more aircraft are to follow soon after the go-live.

"With the first class MRO software from Swiss-AS - the leader in this field - we intend to significantly improve UTair's capabilities in fleet management and MRO efficiency. This is especially important in view of deliveries of more than 80 new fixed wing aircraft expected in 2014-2018," states Oleg Loutsenko, UTair Technical Director."

A group decision

The new multi-entity feature allows corporate organisations to process transactions between different corporate entities within a single AMOS environment. This feature convinced UTair to also offer AMOS implementation to other members of the UTair Group. This includes UTair-Cargo, UTair Express, UTair Ukraine, Vostok Airlines and Tulpar Air among others. Swiss-AS and AMOS are in great demand in Russia and are delighted to gain even further ground in this market with the UTair signature.

About UTair Aviation

UTair operates scheduled domestic and international passenger services, scheduled helicopter services and extensive charter flights with fixed-wing aircraft and helicopters.

In addition, the Russian airline participates in air transport operations of the United Nations Organisation.

UTair's main base is the city of Tyumen, Russia, from where it operates a mixed fleet of more than 100 fixed-wing aircraft and 300+ helicopters.

About Swiss AviationSoftware and AMOS

AMOS - developed and distributed by Swiss AviationSoftware - is a comprehensive, fully-integrated software package that successfully manages the maintenance, engineering and logistics requirements of modern airlines and MRO providers by fulfilling all airworthiness standards. Swiss-AS is a 100% subsidiary of Swiss International Air Lines Ltd., and has more than 120 customers worldwide. This loyal customer base includes pure operators of all sizes, major low-cost, regional and flag carriers, large airline groups and MRO providers. The fact that none have ever replaced AMOS with an alternate system speaks for itself. Swiss-AS is an industry-leading MRO software provider and AMOS is one of the bestselling MRO software solutions worldwide. Swiss-AS has its headquarters in Basel, Switzerland and is also represented in Miami, USA and Singapore.
