Swiss-AS Press Release
First Régional - now HOP! takes off with AMOS
July 2014

At a glance

- **Régional has used AMOS since 2006**
- **HOP! relied on the experience and the expertise of Régional in the choice of AMOS**
- **HOP! will now unite the group members under one AMOS roof**

HOP! to rely on AMOS Multi-Entity functions

Régional (now HOP!-Regional) has used AMOS since 2006. Recently, due to the regrouping of Air France's regional carriers, HOP! had to decide which MRO software to implement for the whole group. The lean maintenance structure of HOP!-Regional and their in-depth knowledge of AMOS functions convinced the rest of the group.

Ronald Schaeuffele, CEO of Swiss-AS, comments: "We fight for every customer and it was very important for us to keep Régional in the customer circle and to convince HOP! to join the AMOS community."

AMOS' Multi-Entity functions, which can host and integrate the three financially independent airlines and enable HOP! to consolidate the activities of three AOCs in one system, proved to be one of the key deciding factors. The project is expected to be challenging - not only the business processes of the three airlines need to be aligned - but their data, too. Nevertheless, the implementation will benefit from the AMOS know-how and experience gained by the HOP!-Regional staff in their daily work with AMOS. This will certainly have a positive impact on the project and is not to be underestimated.

About HOP!

HOP! is a 100% subsidiary of Air France, created in January 2013 and groups the three former airlines Régional, Britair and Airlinair. The French regional carrier operates a fleet of around 100 aircraft (Bombardier, Embraer, ATR) to support its point-to-point network and to supply Air France's hub. Its maintenance is mainly carried out at the two major locations Morlaix and Clermont-Ferrand in France. The maintenance department mainly performs MRO services for their own fleet but also offers its services to 3rd parties.

About Swiss AviationSoftware and AMOS

AMOS is a comprehensive, fully-integrated MRO software solution being developed and distributed by Swiss AviationSoftware. Swiss-AS, being a 100% subsidiary of Swiss International Air Lines, has 130 customers worldwide and belongs to the industry-leading MRO software providers. Our loyal customer base includes pure operators of all sizes, major low-cost, regional and flag carriers, large airline groups and MRO providers.   **SWISS-AS**.COM

Yvon Quérou, CIO of HOP!-IT department, says: "The selection of AMOS as HOP! E&M IT Platform will not only make the IT support easier and more efficient for our E&M Divisions but will also open the way to cost savings in IT maintenance fees."

And Eric Daumalle, Information Manager in the AMOS implementation project, states: "It's an important challenge for all of us to adopt across HOP! a common Maintenance IT System, but this opens an avenue to align processes and share best practices using modern and efficient MRO software."
