

Swiss-AS Press Release

AMOS Customer Conference 2015

November 2015

A great opportunity for networking

The sixth AMOS Customer Conference took place mid of November 2015 at the picturesque Swiss city Lucerne. More than 60 companies accepted the invitation and spent two days with Swiss-AS and partners. The high attendance reflected the rapid growth of the AMOS customer community in recent years.

The main driving force for organising this large event was to offer the AMOS customers a platform to share information and learn from the experiences of their peers. It is unequivocally the most important networking platform that Swiss-AS offers the AMOS customer community.

AMOSmobile/EXEC launched

On day one, Swiss-AS presented its long-term strategy including an update of the functional and technological roadmap, details regarding the AMOS MRO Edition (under development), a live demo of AMOSmobile/EXEC (the Swiss-AS mobile solution for line and base maintenance), and the outcome of its Research Lab initiatives. The evening was rounded off by a joyful dinner with a magnificent view on the lake of Lucerne.

The second day did not only give the AMOS community the opportunity to discover and test new AMOS features, to learn about new service packages, but also to meet Swiss-AS management and staff, AMOS partners and 3rd party product suppliers. Its setup consisted of different booths per subject, to allow personal exchange with Swiss-AS staff and their partners.

Customer feedback: a successful and valuable event

"I loved the AMOSmobile presentation and the one-to-one we can have with Swiss-AS people which helps humanising the relations. I would be delighted to come again!" stated Paulo Jacob, Ryanair.

"It was absolutely fantastic, well organised, Lucerne is totally beautiful; so the venue has been great," said Jainish Chand, Fiji Airways, who had a 26 hour journey to join the conference.

"It's a fantastic chance to get personal with all the AMOS Community," observed Mats Wehlin, Merit Consulting.

About Swiss AviationSoftware and AMOS

AMOS is a comprehensive, fully-integrated MRO software solution being developed and distributed by Swiss AviationSoftware. Swiss-AS, a 100% subsidiary of Swiss International Air Lines has more than 130 customers worldwide and belongs to the industry-leading MRO software providers. Our loyal customer base includes pure operators of all sizes, major low-cost, regional and flag carriers, large airline groups and MRO providers.
