

# Swiss-AS Press Release

## Avianca Holdings fully taking advantage of AMOS Multi-Entity functions July 2016

### At a glance

- All except one airline of Avianca Holdings are now live in AMOS
- Multi-Entity functions of AMOS being a USP

### Series of successful go-lives

Swiss-AS, in cooperation with Lufthansa Systems Americas, is pleased to announce the recent series of go-lives of the Avianca Holdings Airlines. This significant implementation of AMOS across the whole group started in 2013 and AMOS is now used by 7 subsidiaries of Avianca Holdings in Central and South America. Only Avianca Ecuador remains to cut over and will do so soon to complete the whole group.

### Profiting from AMOS Multi-Entity functions

The AMOS multi-entity functions have been designed for airline groups/holdings which intend to share one AMOS productive environment while still keeping the financial data of each entity of the group separate. Thanks to the AMOS multi-entity functions the individual subsidiaries of Avianca Holdings are able to track their own financial data, in one common AMOS environment and are thereby compliant with EASA, FAA and local rules. Also, the AMOS multi-entity functions allows simplified intercompany transactions between the different Avianca entities, such as the selling, loaning or exchange of parts.

The maintenance, and multi-entity functions of AMOS including the multi-operator maintenance program allow this large airline group to harmonize processes, to have full transparency of data regarding all members of the group and to centrally manage all engineering and maintenance activities of each group member.

### About Avianca

Avianca Holdings includes Avianca, TACA, Aerogal, Tampa Cargo, and other subsidiaries. The group has the largest airline network in Latin America, serving directly over 100 destinations in America and Europe with one of the most modern fleet in the region with over 150 aircraft. Avianca Holdings employ more than 19,000 people. The company operates three hubs in Central and South America: San Salvador, Bogotá, and Lima.

### About Swiss Aviation Software and AMOS

AMOS is a comprehensive, fully integrated MRO software solution being developed and distributed by Swiss Aviation Software. Swiss-AS, a 100% subsidiary of Swiss International Air Lines, has over 140 customers worldwide and belongs to the industry-leading MRO software providers. Our loyal customer base includes pure operators of all sizes, major low-cost, regional and flag carriers, large airline groups and MRO providers. In the Americas and in Asia, AMOS is distributed through a partnership with Lufthansa Systems.
